

Vaccine Update

Dear Parents,

If your child is less than 60 months of age (5 yrs.) and has received Prevnar 7 but has not received Prevnar 13, he/she will now need a booster of Prevnar 13 for Kindergarten school entry and daycare, etc.

All children between 12 months (1 year) and 60 months (5 years) of age or in daycare or entering Kindergarten require 2 doses of Hepatitis A for entry.

All other children older than 1 year not in daycare/school will be getting this vaccine at their next routine visit.

All children in Middle School who will be entering the 7th grade are required to have Tdap booster and the meningococcal vaccine. If you have already had your Middle School physical, please call the office to schedule an appointment if your child has not received the above vaccines. This is a new requirement.

These vaccines are required according to the new Connecticut Guidelines. If your child has not had their yearly physical, please schedule as such.

Once again, thank you for allowing us to provide care to your children.

Sincerely,

The Physicians/Practitioners at The Center for Advanced Pediatrics
